## *Strapping Accessories*

Our strapping accessory division is an extensive line of metal strapping seals. Our seals come in multiple sizes and functions. We manufacture seals that can be used with metal, plastic, and polyester strapping or banding. With our in house die building staff, we have the capabilities to create customized strapping seals with your company's logo on top of the seal.

To go along with our seals, Metal Products Company also manufactures Metal Edge Protectors. Our Metal Edge Protectors are commonly used with metal strapping to help protect your product at the tension point with the strapping. We offer Metal Edge Protectors with or without ribs, and can cover up to 1-1/4" width strapping.

We pride ourselves on being an American manufacturer, and because of this, we use all domestically bought steel. Our seals have a hot dipped zinc finish, unless otherwise noted. All of our products are proudly made in the USA.

### Strapping Seals Material Specifics

All seals are manufactured from high quality steel with a hot dipped zinc finish, unless otherwise noted. The galvanized finish provide superior corrosion resistance and minimizes fouling in strapping equipment. The interlocking dimples in the seals permit loading of partial stacks into seal magazines.
